BLANCHED PEANUT

Riding on our experience in the industry, we, as a processor, Supplier and Exporter of Roasted & Blanched Peanuts Split have positioned us in the upper echelons of the industry. The various grades and standards of quality are met by our quality team. We maintain hygiene throughout the production process.

Roasting is done in the roaster at a temperature of 60° to 70° C. This is done to ensure smooth blanching of kernels and then they are blanched and split using different latest technology machinery at our own processing plants. Blanching means removal of outer red skin from peanuts with mild pressure.

Exceptionally demanded in the market for its delicious taste, this peanut is widely used in preparing delicious dishes and sweets. It is used to enhance the taste of the recipe. We also take utmost care of its packaging and transportation to ensure that these are free from any impurities.

PEANUTS IN CELL

MUSTARD

Mustard is a condiment made from the seeds of a mustard plant (white/yellow mustard, *Sinapis alba*; brown mustard, *Brassica juncea*; or black mustard, *Brassica nigra*).

The whole, ground, cracked, or bruised mustard seeds are mixed with water, vinegar, lemon juice, wine, or other liquids, salt, and often other flavorings and spices, to create a paste or sauce ranging in color from bright yellow to dark brown. The seed itself has a strong, pungent, and somewhat bitter taste. The taste of mustard condiments ranges from sweet to spicy.
